Real

Damage Severity :

Minor

Damages Detected

- lamp broken
- scratch

Detailed Description

The car in the image has a dented bumper, which is a visible damage. This could have been caused by a collision, a minor accident, or even a minor impact with an object. The dented bumper may affect the car's appearance and could potentially affect its resale value. To address this issue, the car owner may consider repairing the dented bumper by taking the car to a professional body shop. The repair process typically involves removing the damaged bumper, repairing the dent, and then reinstalling the bumper. The cost of the repair will depend on the extent of the damage and the type of repair required. Additionally, the car owner should also consider taking preventive measures to avoid future damage. This could include using a protective bumper cover, parking the car in a garage or a covered area, and being cautious while driving to avoid collisions. In summary, the car has a dented bumper, which may affect its appearance and resale value. The car owner should consider repairing the damage and taking preventive measures to avoid future damage.
